This action is in response to the amendment filed 9/23/05.

Reasons for Allowance

1. Claims 11-20 and 22 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 11 contains the limitation that the step of exposing the surfaces to an environment for promoting the evaporation comprises applying a voltage bias between the surfaces. As pointed out by the applicant, (in paragraph 11 of the specification), applying a voltage bias between the surfaces (electrodes) involves operating the device. This limitation, in combination with the other limitations of claim 11 is not taught or suggested by the prior art of record. Bensaoula (US20030035261A1) does not evaporate by establishing a voltage bias between the surfaces. The voltage bias established between surfaces in Bensaoula is after degassing.

Claims 12-20 and 22 are allowed as being properly dependent upon allowed claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
